T., 1052-pound steers, 4.00; T. B. Jones, Oaktaha, I. T., the boll weavil infesting twice the territory they did last year and a for crop of any magnitude uncertain, or rather very improbable, what hards have we on which to estimate a crop over 2,500,000 bates. It probably wouldn't help any one, however, to know exactly what the final untering will be as conditions from day to day regulate values, and even if one knew we would raise 15,00,000 bales and have been cotton next July a 1c advance would either turn facts into fancies or make han a candidate for an asylum, so we in a unset things as they are, and it is all the among the beautiful only a few rounds of a long winder dispute have been fought. R. B. Morris & Co.'s Letter. Houston, Texas, September 16, New York cotton futures opened very steady to ton

sections, however the forecast was for moderate temperature.

On the other hands, some sections of the South report the lowest temperature of the season. There was no rain in sight, at cept possibly for Florida. On the whole sentiment was builded.

The heavy receipts falled to make unch impression. Liverpool cables were favorable. The market closed firm with toe sentiment is little mixed.

cently for his European correspondents to you up.

One of our exporters, with large Manheater business, last night offered 500 cles, basis 1-54d up. Liverpool today. When he saw Liverpool this morning he was bunning for the 500 bales to fill the rider, but notwithstanding 7-54d advance as secred on September-October, his of-ser was refused. The advance in Liverpool oday seems to us a good #dication of a grgo-business in the near future, and hould it materialize cotton, with the present small stocks at the trade centers, would see so eagerly sought that holders could easily dictate prices. New Orleans when your sales would be larger if there was more cotton to select from."

Liverpool is due to be unchanged tomorrow; but should they show any improvement whatever we expect to see our markets advance.

Cargill & Richardson, Houston, Texas, September 16. We re-selved today from Mr. Price the following letter: "As stated in my message, my advices indicate that the crop has deterior ated rather than improved during the past two weeks, and I am more than ever coavinced that the yield will prove a moderate one and be found entirely inadequate to one and be found entirely inadequate to meet consumptive requirements at present prices. In my opinion cotton must advance to a point which will check consumption, in order that the supply may prove equal to the demand, and this point, to my mind, is very much above current quotations.

Liverpool evidently began thinking this way this morning; up 7 points, equal to 21 of ours.

Richard Cocke & Co. New Orleans. September 16.—Liverpool dvices were more encouraging than looked in r owing to the Galveston News' estimate that the Texas crop pointed to 10 per cent under last year. Our market in sympathy

Subsequently, however, considerable realizing occasioned a break on the day 10 points. The summary of the weekly weather report was as follows: York, September 18. Bggs-Receipt The very cool weather has checked the opening of cotten in the central and western serion of the cotron region. Picking the advanced rapidly generally throughout.

Kapsts City, September 16.—Eggs—Fresh

The very cool weather has checked the opening of cotton in the central and western section of the cotton region. Piching has advanced rapidly generally throughout the beit and as a role under favorable conditions, nithough pickers have been inadequate in some States. Over the southern portion of the cotton beit the built of the crop has been gathered and in some sections many fields are alvesdy abandoned hains have cameed dainage to open cotton in portions of Arkanans, Louisiana, Georgia, Florida and South Carolina. Spots were farmer and higher in the interfor and it looks as if holders are confident of receiving higher values ultimately. The action of Liverpool today and the favorable character of Manchester advices pesterday wedid indicate that spinners are beginning to get unexay. Also marked improvement in the demand for spots will be speedily reflected in the delivery marker A rumor was circulated that Mr. Neill would soon bane a builtab circular: another stated he was coming out with an estimate of 10.301. One we have that Mr. Neill has denied these rumors, as no importance is to be attached to them. The struction looks healthy and we conflicte to advise huring on all depressions with a view of realizing on strong periods.
